COMET P/2008 E2 = P/2003 KV₂ (LINEAR)

After the posting on the Minor Planet Center's 'NEOCP' webpage of an apparently asteroidal object discovered by the Catalina Sky Survey, S. Foglia (Novara Vereri, Italy) suggested an identification with comet P/2003 KV₂ (cf. *IAUC* 8139), indicating a correction of $\Delta T = +0.8$ day to the prediction by Nakano on *MPC* 56801.
